The attention of the public is called to a great discovery in Dentistry. discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while cating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hithertoused.

Thave secured Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, which scurres the atmospheric pressure on the entire plate.

pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Giman, to wit, the Counties of Frankin, Washington, Chittenden, Lamoulle and Grand Isle. Those wishing to avail themselves

of such improvement, will call on Dr. L. GILMAN, ST. ALBANS VERMONT. N. T. FOLSOM.
